DETAILED ACTION

1. In response to the communication dated December 14, 2001 through February 12, 2003, claims 1-17 are active in this application.

Priority

2. Applicant's claim for domestic priority under 35 U.S.C. 119(e) is acknowledged.

Information Disclosure Statement

3. The information disclosure statement (IDS) filed on December 14, 2001; February 12, 2002; and February 12, 2003 have been considered.

Specification

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

5. Claims 2-7 are objected to because of the following informalities: the phrase "An apparatus" should be changed to --The apparatus--. Appropriate correction is required.
6. Claims 10-15 are objected to because of the following informalities: the phrase "A method" should be changed to --The method--. Appropriate correction is required.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2821

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-3, 8-9, and 16-17 are provisionally rejected under the judicially created doctrine of double patenting over claims 5 and 12-13 of copending Application No. 10/023,800. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows:

a conductive section (an electrically conductive plate); a balun portion (balun hole); a slot portion (slot); said slot portion (slot) having edges on opposite sides thereof which each follow a predetermined curve other than a first-order exponential curve; an elongate conductive element which extends generally transversely with respect to said slot portion (slot) in the region of said one end thereof; and said predetermined curve for each said edge is configured to facilitate minimization of return loss for electromagnetic signals induced within said slot portion (slot) through said elongate conductive element. The apparatus discussed above would perform the claimed method.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other

copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
